BLYCKER NOTES

October 25, 2025

Dear Friends and Family,

This has been an exciting and inspiring week **at Rio Grande Bible College, the annual mission conference**. Various missionaries had displays set up to interact with the students. My son **Jonathan** did a splendid job with the **worship team** every day and evening.

Physically my **mobility and pain** has been worsening. I've had pain management shots and physical therapy to no avail. Oct.3 I had an **MRI of the lower back**. I kept calling for the results, always saying it wasn't ready. A friend recommended I go and wait for it. That got results. Yesterday I had my appointment with the orthopedic surgeon and he had the MRI, which showed the pain is coming from the spine. He gave me a **referral to the spine surgeon** (actually across the hall) and I got an appointment **for this coming Wednesday**. *I have hope*. It's no fun when every step is painful and having to use a walker.

I'm so **thankful for all your support and prayers**. **God is faithful**. There's always been someone close by to carry my **cello** for me, so that ministry continues.

God bless you,

Arleen Blycker
